

## REMARKS

Applicant submits herewith an amended specification in two versions, one being a clean version of the amendment and one version showing the changes made. The Applicant submits that the amended specification addresses informalities noted by the Applicant and clarifies the descriptions in the specification. The amended application nevertheless contains no new matter.

The Examiner objected to the drawings originally submitted with the application. The Applicant submitted a first set of replacement drawings which were accepted. The Applicant now submits a second set of replacement drawings herewith which include reference numerals corresponding to reference numerals used in the specification.

The Examiner rejected Claim 1 under 35 U.S.C. 112 (2), for being indefinite and failing to particularly point out and distinctly claim subject matter. Claim 1 has been cancelled.

Applicant submits new Claims 2-16 for examination.

This amendment is accompanied by an Petition for Extension of Time to Respond and the appropriate fee.

In view of the foregoing amendments and remarks, the Examiner is request to examine the application, to allow Claims 2-16, and to pass the application on to issue.

Respectfully submitted,

---
